

# ORIGIN SMP – OWNER GUIDE

This is a step by step guide for server owner regarding how to install the **ORIGIN SMP** setup.

Before we start make sure you provides all the dependencies. You can use any **Premium** of **Free Version** of it. But some dependencies doesn't have a free Version which are **MagicCosmetics** and **MythicCrucible**, Below are the list and its link where you can download it.

PLUGINS	FREE	PREMIUM
<b>MagicCosmetics</b>	N/A	<a href="#">LINK</a>
<b>MythicCrucible</b>	N/A	<a href="#">LINK</a>
AngelChest	<a href="#">LINK</a>	<a href="#">LINK</a>
Citizens	<a href="#">LINK</a>	<a href="#">LINK</a>
LibDisguise	<a href="#">LINK</a>	<a href="#">LINK</a>
ModelEngine	<a href="#">LINK</a>	<a href="#">LINK</a>
MythicMobs	<a href="#">LINK</a>	<a href="#">LINK</a>
Tab	<a href="#">LINK</a>	
PLhide	<a href="#">LINK</a>	

After you download all the dependencies, put them in plugin folder from the **ORIGIN SMP** setup.

## [Required Changes]

Setup needs to change something depends to your server needs or liking.

Below are the list that need to change. And I suggest to use **Visual Studio code** or **Notepad++** to edit those files.

Go to you plugin folder then step by step to open the file name.

Plugins → BossShopPro → Shops → open [server\\_guide\\_2.yml](#) search all the

ServerStore.com and change it to your website URL.

This are the Lines: [804] [832] [860] [888] [916] [944] [972]

Plugins → MiniMotd → open [main.conf](#) go to line [18] change it to your server name.

Plugins → TAB → open [config.yml](#) go to line [13] change it to your server IP ADDRESS.

To change your LOGO,

Open the **Resources pack folder** → assets → misc → textures → logo

Make sure you already have your own logo and rename it to [smp\\_logo.png](#)

Copy and paste it to this path.

Open the **Resources pack folder** → assets → misc → textures → logo.

### [How to install]

Upload the folder from Origin\_smp\_setup folder after you completed all the changes and dependencies. Server tested in Paper 1.20.1, So of the PaperPork will work as well.

Server Version: 1.20.1

Minimum ram memory: 6gb

Then start your server.

### [Useful Commands]

You can use this to give permission to your donators.

Battlepass Premium: `/lp user <player_name> permission set battlepass.premium`

Silver Crates keys: `/crates key give <player_name> silver <amount>`

Golden Crates keys: `/crates key give <player_name> gold_key<amount>`

Diamond Crates keys: `/crates key give <player_name> diamond <amount>`

Youtuber ranks: `/lp user <player_name> parent add youtuber`

Streamer ranks: `/lp user <player_name> parent add streamer`

Below are the ranks for server developments, Don't give this ranks to other players.

Helper ranks: `/lp user <player_name> parent add helper`

Moderators ranks: `/lp user <player_name> parent add Moderator`

Admin ranks: `/lp user <player_name> parent add Admin`
